Subject: Re: PCB Source Tracing Programs: A Review for Application in Washington State

Hello,

This is just a friendly reminder that comments are due today on the PCB source tracing sections. Thank you to those that have finished already. Please let me know if you have any problems sending a redline version back. I'm traveling today but will be in the office tomorrow.

Thank you,

Jenee Colton

Hello,

We have drafted summaries of your source tracing programs for your review for our project with Washington Department of Ecology to compile and summarize PCB source tracing methods. At this time, we have Sections 1-4 of the report completed, and are still working on Sections 5-7 (see outline below). However, **the most important section for your critical review is Section 4 by Feb. 1.**

Please take the next two weeks to review the content of the relevant subsection for your program in Section 4 for accuracy. This is a rough draft and the text will be polished in the next stage so editorial comments are only needed where they affect meaning. The subsection related to your work should be self-evident except for King County staff, Dan Cargill (Ecology), Lisa Rodenburg, and EPA (Michelle). (Because King County does not actively source trace for PCBs, we did not include a section for King County (your review is not necessary). Dan – we are working on adding a section for Ecology's work in the LDW area. You can read the Seattle, Tacoma, and Spokane sections, but don't feel obliged to comment. Lisa – we have cited some of your work but most of your review will come later on in Sections 5 and 6. Michelle - please review Section 3.0, 4.1 and 4.2.)

Report Outline

1-Introduction

2-Compilation Methods

3-Overview of State and Federal Regulations

4-Source Tracing Programs

- <!--[if !supportLists]--><!--[endif]-->Seattle Area
- <!--[if !supportLists]--><!--[endif]-->Tacoma
- <!--[if !supportLists]--><!--[endif]-->Spokane Region
- <!--[if !supportLists]--><!--[endif]-->Portland
- <!--[if !supportLists]--><!--[endif]-->Delaware River Basin
- <!--[if !supportLists]--><!--[endif]-->San Francisco
- <!--[if !supportLists]--><!--[endif]-->Summary – Discussion to compare and contrast source tracing programs (incomplete at this time)

- 5-Analytical Methods for PCBs (incomplete)
- 6-Challenges and Lessons Learned (incomplete)
- 7-Conclusion (incomplete)

File Download: The Word file is too large to email. You can download it at the following King County FTP site: [//ftpgreen.kingcounty.gov/transfer/colton](http://ftpgreen.kingcounty.gov/transfer/colton) The document should be mirrored onto this server by 10 pm tonight (Friday). Filename is "KC PCB Source Tracing Paper Draft_for External Review 011515"

Review Method: Note there are specific questions in most sections for reviewers to address (see highlighted text). Please make a redline version of the document and either 1) strip out the text you did not review to make the file size smaller or 2) post it to a FTP site I can access and inform me.

Deadline: Please return your comments by **Feb. 1**

Please confirm that you are successful in downloading the file. We need reprint permission for all figures in your sections.

Thank you for all your assistance with this project!

Subject: PCB source tracing program review report

Hello all,

I'm later than expected contacting you regarding review of the draft report on PCB source tracing programs because of staff medical leave issues at the County that have delayed this project. However, I want to give you a status update and check on your upcoming availability to review the report. We are currently drafting the report for initial review by all the folks we interviewed in the spring and summer this year. I plan to send the draft out to you mid-January.

Will you be available for review of the draft report in the latter two weeks of January? If you know you will be out of the office or unavailable, please respond to this email with dates you are out and alternative dates that would work for your schedule. If I don't hear back from you I will assume you will be able to accommodate this late January review schedule.

Thank you and happy holidays!
